Black Forest Medical Group exhibits at the digital DGNC congress

(Freiburg)

Due to the ongoing corona pandemic, the 71st Annual Meeting of the German Society for Neurosurgery (DGNC) is not taking place as a face-to-face event as usual. With a booth at the digital congress of the DGNC, Black Forest Medical Group presents itself to virtual visitors from June 21st to 24th, 2020 with its well-known cranial stabilization and retractorsystems.

Despite the unusual event format, congress participants can take advantage of many benefits relating the scientific exchange. They can, for example, take part in live discussions, exchange ideas with colleagues in the lounge area and call up lectures any time they wish to. Visiting the industrial exhibition is another way of gathering valuable information.

Black Forest Medical Group is represented with a virtual booth, looking forward to welcoming interested visitors. The company has already been able to gain experience in the digital world in the past few weeks offering very successfully multiples webinars.

"We are pleased that the DGNC enables the exchange with experts in the current situation in this way," says Roman Maier, Managing Director of Black Forest Medical Group. "Especially in neurosurgery and neurosurgical medical technology, the transfer of knowledge and active communication is extremely important. That is why we as exhibitors are happy to support the DGNC with our participation," he adds.

Irina Bauer, Director of International Sales of the medical technology specialist, looks forward to familiar faces and new visitors. "There is a lot to discover at our booth," she explains, adding: "For example, we are showing a video clip that demonstrates the simple and safe use of our DORO LUCENT® iMRI Headrest System for intraoperative imaging during a real surgery."

Together with their sales colleagues, Roman Maier and Irina Bauer will be happy to welcome interested parties, advising on individually fitting solutions. Visitors also have the opportunity to get a digital impression of the real safety and quality of the DORO® products using a 3D model of the proven DORO® QR3 Skull Clamp.
